EDUCATION

California State University, Fullerton

Bachelor of Science, Computer Science

Fullerton, CA

December 2023

WORK EXPERIENCE

Center for Behavioral and Educational Services | cbes.us.org

Rosemead, CA

IT Service Desk Technician

May 2022 – Present

- Managed user accounts, groups, and permissions using Active Directory, ensuring seamless access and security across the organization's network.
- Utilized Python scripting to automate routine tasks, streamline processes, and optimize efficiency.
- Demonstrated expertise in Linux operating systems, leveraging command-line interface (CLI) to troubleshoot and maintain system integrity.
- Administered Google Workspace, enhancing collaboration and productivity for staff members.

Web Developer, Contracted

November 2023

- Developed and designed a fully functional static website from inception using SvelteKit and Tailwind.
- Engineered a PHP API with strict adherence to guidelines, preventing abuse and ensuring data integrity.
- Deployed the website to a secure hosting environment, implementing SEO best practices to improve website visibility and search engine rankings.

AppleOne Employment Services | appleone.com

Glendale, CA

Software Engineer Intern

June 2019 – March 2020

- Migrated critical business logic from a legacy Visual Basic .NET application to a modern C#, ASP.NET platform, resulting in a more scalable and maintainable architecture.
- Developed PL/SQL queries, ensuring preservation of data for uninterrupted business operations.
- Innovated the development of a modal interface and successfully introduced it to management, subsequently establishing its adoption across the entire program by the team.
- Participated with 2 cross-functional teams using Jira for project management, task tracking, and issue resolution, ensuring timely delivery of high-quality software solutions.

PROJECTS

ABA focused Graphing Utility (Typescript, Next.js, React, MongoDB)

Current

A full-stack graphing utility focused on Applied Behavioral Analysis (ABA) collection.

- Implementing comprehensive data collection functionalities, allowing users to input behavioral data efficiently and accurately, incorporating validation checks to maintain data integrity and reliability.
- Engineering a graph generation feature, using Recharts, enabling users to visualize behavioral patterns.

TwoFiveFour (Typescript, Node.js, SvelteKit, OpenAI)

May 2023

An AI powered coding assistant to help developers understand and document their code.

- Integrated OpenAI LLMs APIs to facilitate interactive dialogue allowing developers to translate between programming languages, documenting functions, and calculating time complexity of functions.

SKILLS

- Programming Languages: Java, Python, Javascript, C#, SQL, R, Lua
- Technologies: Git, Android, Angular, Node.JS, Oracle DB, MongoDB, Microsoft SQL Server
